Thin Solid Films 298 (1997) 255–258

thin solid films

Subject Index of Volume 298

Acoustics
strain effect in the $YBa_2Cu_3O_{7-x}$ thin film based surface acoustic wave structures, 1
Adsorption
Monte Carlo study of adsorption in energetically and geometrically nonuniform slit-like pores, 22
Alloys
effect of substrate surface treatment on the nucleation and crystal growth of electrodeposited copper and copper–indium alloys, 191
Aluminium alloys
effect of chromic acid anodizing treatment on fretting behaviour during fretting tests on pre-stressed specimens, 170
Aluminium nitride
c-boron–aluminum nitride alloys prepared by ion-beam assisted deposition, 33
Amorphous antimony cluster
spontaneous alloying and crystallization in nanometer sized amorphous antimony clusters, 143
amorphous materials
a simple modification of the magnetron sputtering method for the deposition of boron-doped hydrogenated microcrystalline silicon films with enhanced doping efficiency, 200
annealing study of the optical properties of hydrogenated amorphous silicon–carbon alloy film, 211
Anisotropy
optical anisotropy in thin films of a blue electroluminescent conjugated polymer, 138
Annealing
the formation of $TiSi_2$ by RTA processing, 62
annealing study of the optical properties of hydrogenated amorphous silicon–carbon alloy film, 211
influence of low-temperature annealing on the dielectric characteristics and final parameters of SiO_2 MIS thin film transistors, 241
Anodic oxidation
effect of chromic acid anodizing treatment on fretting behaviour during fretting tests on pre-stressed specimens, 170
Argon
vanadium reactive magnetron sputtering in mixed Ar/O_2 discharges, 122

Boron nitride
c-boron–aluminum nitride alloys prepared by ion-beam assisted deposition, 33

Capillary
Monte Carlo study of adsorption in energetically and geometrically nonuniform slit-like pores, 22
Ceramic coatings
roles of polyethylene glycol in evolution of nanostructure in TiO_2 coatings, 76
Chemical vapour deposition
large scale fluorine doped textured transparent conducting SnO_2 films deposited by atmospheric pressure chemical vapour deposition, 151
two kinds of crystalline state of InSb epilayers on GaAs substrates by metalorganic chemical vapor deposition, 245
Chromium
crystallographic orientation of sputtered Cr films on glass and glass–ceramic substrates, 182
Coatings
preparation, structure and properties of MoS_x films, 98
electrochromism of titanium oxide thin films, 197
deposition of indium tin oxide films on polycarbonate substrates by radio-frequency magnetron sputtering, 221
Computer simulation
Monte Carlo study of adsorption in energetically and geometrically nonuniform slit-like pores, 22
Condensation
Monte Carlo study of adsorption in energetically and geometrically nonuniform slit-like pores, 22
Conductivity
electrodeposition and characterization of thallium(III) oxide films, 156
conductive metallic $LaNiO_3$ films from metallo-organic precursors, 165
Contacts
effect of layer structure on the electrical properties of contacts to p-type $In_{0.53}Ga_{0.47}As/InP$, 9
Copper
strain effect in the $YBa_2Cu_3O_{7-x}$ thin film based surface acoustic wave structures, 1
effect of substrate surface treatment on the nucleation and crystal growth of electrodeposited copper and copper–indium alloys, 191
Crystallinity
electrodeposition and characterization of thallium(III) oxide films, 156
Crystallization
spontaneous alloying and crystallization in nanometer sized amorphous antimony clusters, 143

Deposition processes
influence of low-temperature annealing on the dielectric characteristics and final parameters of SiO_2 MIS thin film transistors, 241
Diamond
photoluminescence spectroscopic investigation on the quality of diamond films grown in oxy-acetylene combustion flame, 14

Elastic properties
axialsymmetric stress relaxation and surface dilation rheology of docosanic acid monolayers spread at the interface of pendant drops in the short time region, 39

Elsevier Science S.A.

Elastic strain
strain effect in the $YBa_2Cu_3O_{7-x}$ thin film based surface acoustic wave structures, 1
Electrical properties
large scale fluorine doped textured transparent conducting SnO_2 films deposited by atmospheric pressure chemical vapour deposition, 151
Electrical properties and measurements
effect of layer structure on the electrical properties of contacts to p-type $In_{0.53}Ga_{0.47}As/InP$, 9
hot wall epitaxy grown indium antimonide films, 47
the microstructure and electrochromic properties of nickel oxide films deposited with different substrate temperatures, 53
characterization of co-electrodeposited and selenized CIS ($CuInSe_2$) thin films, 92
Electrochemical etching
microstructure and photoluminescence of porous Si formed on n-type substrates in the dark, 66
Electrochemistry
electrochromism of titanium oxide thin films, 197
Electrochromism
structure, electrical conductivity and electrochromism in thin films of substituted and unsubstituted lanthanide bisphthalocyanines, 228
Electrodeposition
electrodeposition and characterization of thallium(III) oxide films, 156
Electron diffraction
study on the structure of $Fe_{16}N_2$ single-crystal films by transmission electron microscopy, 116
Electronic devices
electrochromism of titanium oxide thin films, 197
Epitaxy
hot wall epitaxy grown indium antimonide films, 47
two kinds of crystalline state of InSb epilayers on GaAs substrates by metalorganic chemical vapor deposition, 245
Etching
the investigation of the germanium distribution for the optimization of the surface reaction process, 177

Fatty acids
axialsymmetric stress relaxation and surface dilation rheology of docosanic acid monolayers spread at the interface of pendant drops in the short time region, 39
study of Langmuir and Langmuir–Blodgett films of indium arachidate, 237
α''-$Fe_{16}N_2$
study on the structure of $Fe_{16}N_2$ single-crystal films by transmission electron microscopy, 116
Fluorine
the effects of fluorine ion implantation on the formation of SIMOX structure, 147
Fretting
effect of chromic acid anodizing treatment on fretting behaviour during fretting tests on pre-stressed specimens, 170
Friction
design of a Ti/TiC/DLC functionally gradient coating based on studies of structural transitions in Ti–C thin films, 107

Gallium arsenide
structural and optical properties of undoped and doped ZnSe/GaAs strained heterostructures, 187
Germanium
the investigation of the germanium distribution for the optimization of the surface reaction process, 177
Glass–ceramics
crystallographic orientation of sputtered Cr films on glass and glass–ceramic substrates, 182

Hard coatings
design of a Ti/TiC/DLC functionally gradient coating based on studies of structural transitions in Ti–C thin films, 107
Heat treatment
conductive metallic $LaNiO_3$ films from metallo-organic precursors, 165

Impurities
photoluminescence spectroscopic investigation on the quality of diamond films grown in oxy-acetylene combustion flame, 14
Indium
effect of substrate surface treatment on the nucleation and crystal growth of electrodeposited copper and copper–indium alloys, 191
Indium antimonide
hot wall epitaxy grown indium antimonide films, 47
Indium oxide
deposition of indium tin oxide films on polycarbonate substrates by radio-frequency magnetron sputtering, 221
Ion-beam-assisted deposition
c-boron–aluminum nitride alloys prepared by ion-beam assisted deposition, 33
Ion implantation
the effects of fluorine ion implantation on the formation of SIMOX structure, 147

Langmuir–Blodgett
structure, electrical conductivity and electrochromism in thin films of substituted and unsubstituted lanthanide bisphthalocyanines, 228
Langmuir–Blodgett films
study of Langmuir and Langmuir–Blodgett films of indium arachidate, 237
$LaNiO_3$ film
conductive metallic $LaNiO_3$ films from metallo-organic precursors, 165
Laser ablation
laser-induced oxidation of metals: state of the art, 160
Laser irradiation
laser-induced oxidation of metals: state of the art, 160
Luminescence
photoluminescence spectroscopic investigation on the quality of diamond films grown in oxy-acetylene combustion flame, 14
optical anisotropy in thin films of a blue electroluminescent conjugated polymer, 138

Mechanical properties
design of a Ti/TiC/DLC functionally gradient coating based on studies of structural transitions in Ti–C thin films, 107
Metallo-organic precursor
conductive metallic $LaNiO_3$ films from metallo-organic precursors, 165
Metals
laser-induced oxidation of metals: state of the art, 160
Microstructure
microstructure and photoluminescence of porous Si formed on n-type substrates in the dark, 66
Molecular beam epitaxy (MBE)
structural and optical properties of undoped and doped ZnSe/GaAs strained heterostructures, 187
Molybdenum sulphide
preparation, structure and properties of MoS_x films, 98
Monolayers
axialsymmetric stress relaxation and surface dilation rheology of docosanic acid monolayers spread at the interface of pendant drops in the short time region, 39
study of Langmuir and Langmuir–Blodgett films of indium arachidate, 237

Multilayers
effect of layer structure on the electrical properties of contacts to p-type $In_{0.53}Ga_{0.47}As/InP$, 9
study of Langmuir and Langmuir–Blodgett films of indium arachidate, 237

Nanoparticles
electrodeposition and characterization of thallium(III) oxide films, 156
electrodeposition and characterization of thallium(III) oxide films, 156
Nitrides
study on the structure of $Fe_{16}N_2$ single-crystal films by transmission electron microscopy, 116
Nucleation
effect of substrate surface treatment on the nucleation and crystal growth of electrodeposited copper and copper–indium alloys, 191

Optical properties
preparation and properties of TiO_2–SiO_2 (1 : 1) films prepared by a complexing agent-assisted sol–gel process, 89
optical anisotropy in thin films of a blue electroluminescent conjugated polymer, 138
large scale fluorine doped textured transparent conducting SnO_2 films deposited by atmospheric pressure chemical vapour deposition, 151
structural and optical properties of undoped and doped ZnSe/GaAs strained heterostructures, 187
annealing study of the optical properties of hydrogenated amorphous silicon–carbon alloy film, 211
ultrafast optical bistable behaviors of vanadyl phthalocyanine-doped polymer film quasi-waveguide and waveguide, 215
deposition of indium tin oxide films on polycarbonate substrates by radio-frequency magnetron sputtering, 221
donor–acceptor pair luminescence in $Zn_{0.8}Cd_{0.2}Se$–ZnSe strained-layer superlattice, 249
Optical spectroscopy
polarized optical absorption spectra of orientation aligned vanadyl phthalocyanine films, 83
Organic compounds
roles of polyethylene glycol in evolution of nanostructure in TiO_2 coatings, 76
Organic substances
polarized optical absorption spectra of orientation aligned vanadyl phthalocyanine films, 83
ultrafast optical bistable behaviors of vanadyl phthalocyanine-doped polymer film quasi-waveguide and waveguide, 215
Organometallic vapour deposition
donor–acceptor pair luminescence in $Zn_{0.8}Cd_{0.2}Se$–ZnSe strained-layer superlattice, 249
Orientation
crystallographic orientation of sputtered Cr films on glass and glass–ceramic substrates, 182
Oxides
laser-induced oxidation of metals: state of the art, 160
Oxygen
vanadium reactive magnetron sputtering in mixed Ar/O_2 discharges, 122

Photoluminescence
microstructure and photoluminescence of porous Si formed on n-type substrates in the dark, 66
Phthalocyanine
structure, electrical conductivity and electrochromism in thin films of substituted and unsubstituted lanthanide bisphthalocyanines, 228
Physical vapour deposition
polarized optical absorption spectra of orientation aligned vanadyl phthalocyanine films, 83
Plasma processing and deposition
the investigation of the germanium distribution for the optimization of the surface reaction process, 177
Polyethylene glycol
roles of polyethylene glycol in evolution of nanostructure in TiO_2 coatings, 76
Polymers
optical anisotropy in thin films of a blue electroluminescent conjugated polymer, 138
the investigation of the germanium distribution for the optimization of the surface reaction process, 177
ultrafast optical bistable behaviors of vanadyl phthalocyanine-doped polymer film quasi-waveguide and waveguide, 215
Porosity
Monte Carlo study of adsorption in energetically and geometrically nonuniform slit-like pores, 22

Raman scattering
characterization of strontium barium niobate films prepared by sol–gel process using 2-methoxyethanol, 57
Rutherford backscattering spectroscopy
effect of layer structure on the electrical properties of contacts to p-type $In_{0.53}Ga_{0.47}As/InP$, 9

Saturation magnetisation
study on the structure of $Fe_{16}N_2$ single-crystal films by transmission electron microscopy, 116
Scanning tunnelling microscopy
structure, electrical conductivity and electrochromism in thin films of substituted and unsubstituted lanthanide bisphthalocyanines, 228
Selenium
characterization of co-electrodeposited and selenized CIS ($CuInSe_2$) thin films, 92
Semiconductors
annealing study of the optical properties of hydrogenated amorphous silicon–carbon alloy film, 211
two kinds of crystalline state of InSb epilayers on GaAs substrates by metalorganic chemical vapor deposition, 245
Silicides
the formation of $TiSi_2$ by RTA processing, 62
Silicon
microstructure and photoluminescence of porous Si formed on n-type substrates in the dark, 66
a simple modification of the magnetron sputtering method for the deposition of boron-doped hydrogenated microcrystalline silicon films with enhanced doping efficiency, 200
Silicon dioxide
preparation and properties of TiO_2–SiO_2 (1 : 1) films prepared by a complexing agent-assisted sol–gel process, 89
Silicon oxide
the effects of fluorine ion implantation on the formation of SIMOX structure, 147
influence of low-temperature annealing on the dielectric characteristics and final parameters of SiO_2 MIS thin film transistors, 241
SIMS
the formation of $TiSi_2$ by RTA processing, 62
Single-crystal films
study on the structure of $Fe_{16}N_2$ single-crystal films by transmission electron microscopy, 116
Solid phase interaction
silicide formation in thin film Pt–Si(111) structure by USXES data, 135

Spontaneous alloying
spontaneous alloying and crystallization in nanometer sized amorphous antimony clusters, 143
Sputtering
the microstructure and electrochromic properties of nickel oxide films deposited with different substrate temperatures, 53
preparation, structure and properties of MoS_x films, 98
vanadium reactive magnetron sputtering in mixed Ar/O_2 discharges, 122
X-ray reflectivity analysis of thin TiN and TiO_xN_y films deposited by dual-ion-beam sputtering on (100)Si substrates, 130
a simple modification of the magnetron sputtering method for the deposition of boron-doped hydrogenated microcrystalline silicon films with enhanced doping efficiency, 200
deposition of indium tin oxide films on polycarbonate substrates by radio-frequency magnetron sputtering, 221
Stress
effect of chromic acid anodizing treatment on fretting behaviour during fretting tests on pre-stressed specimens, 170
Structural properties
photoluminescence spectroscopic investigation on the quality of diamond films grown in oxy-acetylene combustion flame, 14
characterization of co-electrodeposited and selenized CIS ($CuInSe_2$) thin films, 92
study on the structure of $Fe_{16}N_2$ single-crystal films by transmission electron microscopy, 116
the effects of fluorine ion implantation on the formation of SIMOX structure, 147
a simple modification of the magnetron sputtering method for the deposition of boron-doped hydrogenated microcrystalline silicon films with enhanced doping efficiency, 200
Superconductivity
strain effect in the $YBa_2Cu_3O_{7-\delta}$ thin film based surface acoustic wave structures, 1
Superlattices
donor–acceptor pair luminescence in $Zn_{0.8}Cd_{0.2}Se$–ZnSe strained-layer superlattice, 249
Surface and interface states
two kinds of crystalline state of InSb epilayers on GaAs substrates by metalorganic chemical vapor deposition, 245
donor–acceptor pair luminescence in $Zn_{0.8}Cd_{0.2}Se$–ZnSe strained-layer superlattice, 249
Surface homogeneity
Monte Carlo study of adsorption in energetically and geometrically nonuniform slit-like pores, 22
Surface morphology
characterization of co-electrodeposited and selenized CIS ($CuInSe_2$) thin films, 92
Surface stress
axialsymmetric stress relaxation and surface dilation rheology of docosanic acid monolayers spread at the interface of pendant drops in the short time region, 39
Surface structure
structural and optical properties of undoped and doped ZnSe/GaAs strained heterostructures, 187

Thallium(III) oxide
electrodeposition and characterization of thallium(III) oxide films, 156
Thin film silicides
silicide formation in thin film Pt–Si(111) structure by USXES data, 135
Tin oxide
large scale fluorine doped textured transparent conducting SnO_2 films deposited by atmospheric pressure chemical vapour deposition, 151
Titanium
the formation of $TiSi_2$ by RTA processing, 62
Titanium nitride
X-ray reflectivity analysis of thin TiN and TiO_xN_y films deposited by dual-ion-beam sputtering on (100)Si substrates, 130
Titanium oxide
preparation and properties of TiO_2–SiO_2 (1 : 1) films prepared by a complexing agent-assisted sol–gel process, 89
X-ray reflectivity analysis of thin TiN and TiO_xN_y films deposited by dual-ion-beam sputtering on (100)Si substrates, 130
electrochromism of titanium oxide thin films, 197
Transistors
influence of low-temperature annealing on the dielectric characteristics and final parameters of SiO_2 MIS thin film transistors, 241
Transmission electron microscopy
the microstructure and electrochromic properties of nickel oxide films deposited with different substrate temperatures, 53
spontaneous alloying and crystallization in nanometer sized amorphous antimony clusters, 143

Ultra-soft X-ray spectroscopy
silicide formation in thin film Pt–Si(111) structure by USXES data, 135

Vacuum annealing
silicide formation in thin film Pt–Si(111) structure by USXES data, 135
Vanadium
vanadium reactive magnetron sputtering in mixed Ar/O_2 discharges, 122

X-ray diffraction
the microstructure and electrochromic properties of nickel oxide films deposited with different substrate temperatures, 53
characterization of strontium barium niobate films prepared by sol–gel process using 2-methoxyethanol, 57
preparation and properties of TiO_2–SiO_2 (1 : 1) films prepared by a complexing agent-assisted sol–gel process, 89
X-ray scattering
preparation, structure and properties of MoS_x films, 98
X-ray reflectivity analysis of thin TiN and TiO_xN_y films deposited by dual-ion-beam sputtering on (100)Si substrates, 130
